Job Application:
Junior Data Scientist

clearbox.ai

Junior Data Scientist

Are you a fresh graduate in search of the right opportunity to kickstart your career in Artificial Intelligence?

Do you want to be a part of a dynamic technology startup working on enabling trustworthy AI in companies? Do you like autonomy and a trusting work environment?

Do you want to learn about state-of-the-art production ready AI models with real world data sets from day 1?

Do you like to transform technical insights into compelling data stories?

If yes, you have come to the right place.

Candidate Profile

As Junior Data Scientist at Clearbox AI Solutions, you will be part of the AI team that builds, tests and improves our flagship product: the **Clearbox AI model assessment** used to efficiently assess, explain, monitor and improve AI models.

Responsibilities

- Collaborate with the machine learning and software engineering team to test and improve our AI model assessment tool from a data science point of view;

- Develop and test visualisations to augment the explanations provided by our tool;

- Understand and test feature requests from the customer's point of view and inform the ML team on the direction of future product feature development;

- Contribute to technology blog-posts and collaborate with interns and master thesis students at the company.

Requirements

- You have an MSc. in Data Science, Computer Science, Software Engineering, Mathematics, Statistics, ICT for Smart Societies, Aerospace Engineering, Biomedical Engineering, or a related field;

- You have good data visualisation skills and have a working knowledge of Python;

- You are able to process different types of data and draw insights from large data sets;

- You are an enthusiastic and adaptive team player with a drive to learn new technologies and techniques;

- You must've graduated before the starting date or in the last 10 months. You should hold an Italian residency.

Bonus qualifications

- Knowledge of leading machine learning algorithms, computing platforms and packages;

- Experience with distributed Cloud Computing Platforms such as AWS.

Selection Process and Timeline

Write an email to **info at clearbox dot ai** with answers to these questions together with your CV:

Why do you want to work at Clearbox AI? What excites you about being a data scientist? What are your key skills or past projects that you think will add the most value to Clearbox AI's mission?

Applications are open until **14 February 2021**. We will evaluate the applications continuously and will send interview invitations accordingly. Interviews will be conducted on **16 and 18 February 2021**.

The expected starting date of this position is **1 March 2021**.

Employment type and duration

6 month paid traineeship. After the 6 month period, we will evaluate the traineeship performance and the company requirement to extend the job to a stable placement, with a job promotion and considerable salary raise.

Salary and experience level

Salary is **1200 euros/month (gross/lordo)**.
No prior experience needed.

About Clearbox AI

Our mission is to enable trustworthy, robust and human-centric AI adoption in companies.

We offer a very competitive salary package and flexible working options. You can be part of a team that is diverse and international. Clearbox AI has a flat organisational structure and provides a highly diverse, open and safe working environment where employees have the optimal conditions to be innovative and to thrive. We have strong ethics and values and would like to create a positive impact on society with technology as powerful as AI.

Clearbox AI considers applicants for all positions without regard to race, colour, religion or belief, marital status, sexual orientation and gender identity.

What we offer

- An exciting and fast-paced start-up environment with a great potential for growth;

- A fun, supportive, engaging and trusting environment. We make sure that our people are valued and appreciated;

- Opportunities to pursue and work on cutting edge AI technologies from day 1;

- Professional training and development activities including coaching from AI and software experts;

- Competitive compensation and fringe benefits;

- Flexible working options.

Job Location: Turin, Italy

Remote work has been the norm in the past year. However we hope to work from the office occasionally in 2021, Covid situation permitting.
